

SmartPack

Automatic Compacting Receptacle

**Similar In Size & Appearance To
Traditional Trash Bins. At Least 10 Times
More Effective For Managing Waste!**

The SmartPack is a commercial trash receptacle which automatically compacts trash based on customer traffic flow. Compact trash directly at the source, right where it is disposed of... in your dining or other public use area! It just makes sense! The fully-automatic SmartPack can be used anywhere patrons dispose of their own trash in public areas. Offering a very quick payback through savings in labor, waste hauling and trash liners, the SmartPack is a necessity for quick-service restaurants, malls, airports, schools and colleges, etc!

The SmartPack can also play messages to your patrons. That's right, it talks too! Use your SmartPack trash receptacle to broadcast messages with the optional Programming System. Advertise special offers, promotional campaigns, or just tell your customers thank you and please come again. The SmartPack allows more opportunities and flexibility with marketing programs that would otherwise generate too much trash to handle. The SmartPack Automatic Compacting Receptacle, another great idea from Harmony Enterprises...

- **Save 50% Or More On Waste Processing**
- **Save 75% On Labor Requirements**
- **Save 50% On Waste Handling**
- **Save 30% On Trash Liners**
- **Save 25% On Receptacles (Annualized)**

 **WASTEC**

It's The Perfect Trash Control System for High Volume Waste Management!

Trash control is of vital importance in today's society. Industries such as: Health Care, Education, Food Service, Housing Complexes, Hospitality Firms, Theme Parks, Hotel Chains, Fast Food Companies, the Military and others need to get a handle on the control and removal of their waste. With an ever increasing population and the shrinking availability of landfill facilities there is a pressing need to reduce the volume and decrease the handling of trash. It's becoming an economic reality in today's world. The answer is the Power Packer!

Power Packer... Not Only Gets The Job Done, It Saves You Money In The Process

The Power Packer System is the perfect answer to total trash control. Power Packer offers you three different sizes to cover most any application. They are: the 300SS, 450SS, and the 700SS. All three offer superior design and construction using stainless steel throughout. They all provide huge savings in trips to the dumpster, fewer pickups by the hauler, improved security, easier housekeeping, superior sanitation and a quick return on your investment. In addition, Power Packer is easy to use, saves space and labor costs.

Standard Features Found On All Power Packer Models

- ① Locking Key Switch ② Full Indicator Light & Buzzer
- ③ Air Sanitizer ④ Heavy-Duty Cylinder ⑤ All Stainless Steel Cabinet
- ⑥ Hydraulic Ejector ⑦ Safety Door Locks ⑧ Swivel Locking Front Casters & Optional Drip Pan Available

Dramatically Lowers Hauling Costs

Power Packer will change forever the way you think about hauling costs. No longer do you need to have your hauler pick up your loose trash 3-6 times a week. It gets it down to one or less. This can save you 40%-70% on your waste handling bills. That can add up to big money. Power Packer pays you back in a hurry. You don't even need a special dumpster!

Better Security For Your Business and Employees

Robbery of your place of business is sadly an ever-present danger. We are all shocked when we learn on the nightly news that another fast food restaurant, convenience store or other businesses experience a tragic incident. Power Packer reduces the risk by keeping exposure to your employees to a minimum. No longer will your employees be dumping the trash outside late at night. Why place your employees at risk?

1. Remove Bag From Bag Dispenser

2. Insert Bag Into Power Cube

3. Slide Cube Into Power Packer

4. Load Trash, Close Door And Cycle Unit

5. When Full, Eject Cube Into Power Lift

Model 300SS

Model 450SS

Model 700SS

Three Models... One To Fit Your Needs.

**Call Us Today:
1.800.658.2320**

Saves You Big In Labor Costs

Power Packer compacts your trash up to 1/25th of the original volume and controls waste at the point of generation resulting in fewer trips to the outside waste dumpster. This fact allows your employees to spend much more time doing productive tasks generating more revenue for you, as well as reducing the chance for workman's compensation claims and back injuries from lifting heavy trash bags.

Easier Housekeeping

Power Packer keeps your place of business much neater and cleaner. The Power Packer compacts your trash directly into a neat clean trash cube, eliminating a lot of problems associated with uncovered trash. Your point of origin is kept a lot neater also. In addition, the Air Sanitizer removes odor by cleaning the air in the compaction chamber. This kills bacteria and germs keeping things sanitary and odor free.

Reduces Opportunity For Employee Pilferage

We all experience the occasional employee who because he or she makes many trips outside sometimes takes food and beverage products along for use at home. Since trips outside are kept to a minimum the likelihood of this happening drops to almost nothing. You keep food commodity in house and it reduces potential theft opportunities.

Upgrades The Appearance Of Your Property

Power Packer by its very nature, keeps rodents, flies, birds and other unsightly problems at bay. No longer will you have a pile of trash out back that your customers see, smell and have to navigate around. Your image is instantly improved by Power Packer and the lack of trash at your location. It is sanitized, wrapped and kept at one location with Power Packer.

Lessens Fire Hazards & Complies With Health Standards

Power Packer will keep your fire marshal and health official happy. This reduces the chance of being issued a citation for clean up that can be costly. Up to 25 bags or piles of trash now become one neat, wrapped cube with Power Packer. It sets the stage for an image of compliance and strict leadership on local health, safety and fire mandates.

Power Packer Is Also Available In a Rear Chute Version for High Rise and Apartment Applications.

**6. Seal Bag And Separate Top
Of Power Cube From Trash**

**7. Transport Cube Of
Trash To Dumpster**

**8. Lift And Load Trash
Into Dumpster**

Keeping Trash Under Control At Its Source

A real problem in controlling trash is found at the source. Food preparation kitchens, school cafeterias, housekeeping areas, fast food restaurants, hotels, and similar situations need the help of Power Packer. They eliminate much of the labor and handling time by compacting and baling trash right at the source. Nothing could be neater and more efficient.

Manage Waste Control With... Power Packer

How we manage waste is one of the biggest challenges facing all of us that generate waste and trash. With Power Packer you get a handle on how waste is processed and disposed of. This all takes a system and that system is Power Packer.

Recycling Programs Are The Law... And Power Packer Helps You Enforce It

With the passing of each year we find that more government regulations are mandated and enforced. Soon trash management and recycling will be a fact of life for every business and institution. Power Packer will be the solution and eliminates the need for a different dump site for each type of waste.
